

How to Draw a Bicycle

In 8 Easy Steps

FIRST: Go grab a pen and some paper and try this: Using only your memory, draw a bicycle.

Drawing a bicycle from memory is harder than it sounds! Only about 25% manage to accurately sketch a bike. Check out what the other 75% sometimes look like:

gianlucagimini.it/prototypes/velocipedia.html

SECOND: Give it another go by following the guide on the next page. How does this drawing compare to your first sketch?
